CHOU YAMATA

#129E1 Street 217, Village 15, Sangkat Boeng Salang
Khan Tuol Kork, Phnom Penh Cambodia
E-mail: lovelikeyou9@gmail.com
Telephone: 010411311

CAREER OBJECTIVE

Motivated and detail-oriented professional seeking a challenging role that integrates programming and mechatronics/robotics engineering. I aim to leverage my skills in software development, automation, and mechanical design to develop innovative robotic systems, intelligent machines, and automated solutions. Passionate about bridging hardware and software, I am committed to contributing to cutting-edge projects that enhance efficiency, precision, and technological advancement.

KEY SKILLS

Programming & Development:
C++, C#, Java, JavaScript, TypeScript, Python, Assembly Language, Node.js, Angular, HTML, CSS, Full-stack Web Development, Reverse Engineering, Cyber Security, Ethical Hacking, SQL, IIS, Windows Server, Linux, Kali Linux, MongoDB, MySQL, Oracle, SQL Server Management Studio, Docker, GitHub, Vercel, Navicat, Visual Studio, Visual Studio Code

Design & Multimedia:
Adobe Photoshop, Illustrator, Animate, After Effects, XD, Premiere Pro, DaVinci Resolve, Figma, 2D & 3D Game Creation, Studio Photography

Engineering & Technical Tools:
AutoCAD, SketchUp, QuickBooks, Microsoft Word, Excel, PowerPoint

Networking & Security:
Wireshark, Kali Linux, Network Configuration, Cloudflare, Namecheap

Other Skills:
Mathematical Modeling, Logical Thinking, Problem Solving, Team Collaboration, Project Planning, System Analysis, Design Thinking

EDUCATION

2023 – Present Pursuing a Bachelor of Science in Information Technology
Management Information System (MIS)
SETEC INSTITUTE, Phnom Penh Cambodia

WORK EXPERIENCE

Programmer & Automation Engineer
Boeing Company – Phnom Penh, Cambodia
2024 – Present

- Developed and optimized automation programs for mechanical components and industrial machinery.
- Programmed embedded systems, robotic controls, and software tools using C#, Python, and SQL.
- Tested, debugged, and simulated robotic systems and automated processes to ensure reliability and efficiency.
- Assisted in documenting system designs, software architecture, and integration procedures.

Freelance Programmer & Mechatronics/Robotics Engineer
Self-Employed / Project-Based – Phnom Penh, Cambodia
2023 – Present

- Designed and developed mechanical components, robotic systems, and automated machines using AutoCAD, SketchUp, and other engineering tools.
- Programmed embedded systems, robotic controls, and automation software using C++, C#, Python, Node.js, and Arduino/PLC platforms.
- Integrated AI and machine learning algorithms to enhance robot perception, decision-making, and automation efficiency.
- Built and tested prototypes including robotic arms, smart machines, and IoT-enabled devices.
- Collaborated with multidisciplinary teams to ensure seamless integration of hardware and software systems.

CERTIFICATIONS

- The Complete Cyber Security Course: End Point Protection / Network Security / Hackers Exposed / Anonymous Browsing
- Learn Network Hacking From Scratch (WiFi & Wired)
- The Ultimate Dark Web, Anonymity, Privacy & Security Course
- The Ultimate MySQL Bootcamp: Go from SQL Beginner to Expert
- Learn Ethical Hacking From Scratch / Using The Cloud From Scratch
- Learn Bug Bounty Hunting & Web Security Testing From Scratch
- ARP spoofing &Man In The Middle Attacks Execution &Detection

- Website Hacking / Penetration Testing
- Nmap for Ethical Hackers - The Ultimate Hands-On Course
- Learn Python & Ethical Hacking From Scratch
- Learn Wi-Fi Password Penetration Testing (WEP/ WPA/ WPA2)
- Network Hacking Continued - Intermediate to Advanced
- Learn C++ for Game Development
- C++ Fundamentals: Game Programming For Beginners
- Math For Video Games: The Fastest Way To Get Smarter At Math
- Beginner C++ Programming - From Beginner to Beyond
- The Complete Web Development Bootcamp
- Reverse Engineering 1: x64dbg Debugger for Beginners
- Reverse Engineering 2: Windows GUI Programs
- Reverse Engineering 3: x64dbg Graphical Static Analysis
- Reverse Engineering 4: Software Protection
- Reverse Engineering 5: Reversing Visual Basic
- Reverse Engineering 6: Reversing .NET with dnSpy
- Assembly Language Programming for Reverse Engineering
- Reverse Engineering and Malware Analysis Fundamentals
- Kali Linux Tutorial For Beginners
- Complete Linux Training Course to Get Your Dream IT Job

LANGUAGES

- English - Intermediate (ACE - Level 7)
- Khmer - Mother Tongue
