Dear Mr. Atiya,

I am writing to express my interest in the Programmer & Mechatronics/ Robotics Engineer position at ABB Robotics – North America. With a strong background in programming, automation, and mechanical design, I am eager to contribute to projects that integrate hardware and software to develop intelligent machines, industrial robots, and automated solutions.

Currently pursuing a Bachelor of Science in Information Technology (Management Information Systems) at SETEC Institute, I have developed extensive experience in C++, C#, Python, Java, JavaScript, Node. js, and full-stack development, along with expertise in embedded systems, AI integration, and automation software. My practical experience includes designing robotic systems, building IoT-enabled devices, and developing automation programs for mechanical and industrial machinery.

In my role at Boeing Company, I developed and optimized embedded systems and robotic controls, tested prototypes, and documented system designs to ensure reliability and efficiency. Additionally, as a freelance mechatronics and robotics engineer, I have designed robotic arms, smart machines, and automated devices while collaborating with multidisciplinary teams to ensure seamless hardware-software integration.

I am confident that my combination of programming expertise, mechanical design skills, and hands-on robotics experience aligns well with ABB Robotics' mission to deliver innovative and intelligent automation solutions. I would welcome the opportunity to discuss how my skills can contribute to your team's ongoing projects.

Thank you for considering my application. I look forward to the possibility of contributing to ABB Robotics' innovative initiatives.

Sincerely,

Chou Yamata
